

## Alderson Printers, West Molesley

Alderson Brothers Printing Company planned to relocate to a new 3500m<sup>2</sup> building in West Molesley. The project involved the design, foundations and construction of a portal frame building to accommodate the expanding business.

Client:	Alderson Brothers Printing Company
Main Contractor:	Allied Steel Frame Structures
Value of Foundations:	
Scope of Works:	

### Foundations

The contract, with Allied Steel Frame Structures Ltd involved the installation of foundations and a floor slab for the building. Printing machine bases were also a requirement and needed to be to specialist tolerances and finishes.

The new portal building, developed on their existing site, included the design and provision of a steel frames building, cladding, 2.5m high brickwork to the perimeter, drainage, car parking and a brickwork boundary wall.

There was a strict deadline as Alderson printers were expecting to take delivery of 2 new 2.5-3.0 Tonne printing machines so all the works needed to be completed on time.

This is one of a number of contracts where All Foundations and Allied Steel Frame Structures have worked together in order to provide a seamless contract from design to completion.
